## Principal's Desk

Jacques delors say's "Education is based on the four pillars of Learning to Be, Learning to know eachother, Learning to Do & Learning to live & share together,"

A School is essentially an abode of learning that influences the all round development of pupils. It is the very fundamental process in the formation & development of a great civilization.

It has many tools such as discipline, training, tutoring etc through which strong foundation of a progressive and developed society is laid.

As we all are familiar with proverb 'time and tide waits for none' Time is invaluable and precious.

Effective time management is the need of hour for the student, the teacher as well as the parents.

Students need to be alert, to be an optimistic worker, to be confident & active learner and to be persistent in their efforts.

We as teachers, can play the role of effective facilitators of learning by making children understand **HOW TO LEARN EFFECTIVELY** rather than talking them **WHAT TO LEARN**.

Teachers need to deal with individual differences in order to make learning easier. Success of a nation depends on education of its people. Education has to be at the core of national development.

As parents, we need you to develop a close rapport with the school and teachers for the proper progress of your ward.
